123 Anywhere St., Any City

EDUCATION

ERU University

Bachelor of Data Science & AI
2020 - 2023

SKILLS

- Management Skills
- Creativity
- Machine learning
- Negotiation
- Critical Thinking
- Leadership

LANGUAGE

- English
- Arabic

ABOUT ME

Data Analyst & Machine Learning enthusiast skilled in Python, SQL, Power BI, Pandas, Scikit-learn, and Deep Learning.

Experienced in data analysis, database design, predictive modeling, and dashboard development.

Passionate about turning data into insights and building smart, automated solutions.

EXPERIENCE

Coffee House Sales Insights – Egypt Café Group

Arowwai Industries | 123 Anywhere St., Any City

Analyzed sales data to identify trends and improve marketing decisions. Built dashboards with Power BI and optimized reports using Python and SQL.

Customer Behavior Analytics – Urban Beans Café

Arowwai Industries | 123 Anywhere St., Any City

Developed customer insights and demand forecasting models using Python (Pandas, Scikit-learn) and MySQL, improving inventory efficiency by 12%.

Machine Learning Projects

1. Car Price Prediction Model (2023)

Developed a regression model to predict car prices using the CarPrice_Assignment.csv dataset.

Performed data cleaning, feature selection, and model training using Linear Regression, achieving high prediction accuracy with Scikit-learn and Pandas.

2. Cancer Data Analysis & Prediction (2024)

Built predictive models using Random Forest and Linear Regression to analyze cancer data and identify key factors affecting diagnosis.

Applied data preprocessing, outlier detection, and feature engineering for improved model performance.

3. Movie Genre Classification (2024)

Designed a classification model to predict movie genres based on metadata (director, actors, budget, etc.).

Used Logistic Regression, Decision Tree, Random Forest, Gradient Boosting, Voting Classifier, and a Neural Network (Keras) to compare model performance.
